VX 520

## Redefine your register

With components built to last, connectivity options that fit your needs, enhanced memory and a beautiful backlit screen – experience the most advanced device in countertop payments: the VX 520.

Process faster than ever before with an intelligent, reliable machine designed to take your sales to whole new levels.

*Speed-of-light processing*

*Intuitive design*

*Trusted functionality*

## Unbridled performance

- Keep transactions coming with the industry's fastest processor
- PCI PED 2.0 approval is updated with current PIN security standards
- Backed by the powerful VX Evolution, a breakthrough platform built on the time-tested Verix operating system

## Brilliant, advanced features

- Boost your memory: over 500 MB (instead of the standard 160 MB) to accept even more payments
- See in the dark: high-contrast, white backlit display and blue backlit keypad
- Refill in a snap: quick-release, transparent paper door for easy open and load
- Keep things tidy: compact and ergonomic style with a small footprint

## Designed for small businesses

- GPRS connectivity lets you process with only a power source
- Ethernet connectivity without hesitation keeps sales right on track
- Unmatched security offers the latest and greatest in protection

For connectivity, you've got options with the VX 520. Use dial or dial plus Ethernet and the optional battery to process from anywhere. Countertops stay clear with the communication port area placed underneath the device. Genius.
