

# A Better Way to Process Payments

## Meet CSG Forte: A Leader in Government Payments

Since 1998, CSG Forte has helped more than 10,000 local and state government agencies take payments, so we understand the importance of building the right solutions to meet your needs. We pride ourselves on customer service, just like WasteWORKS does. This means you're our number one priority, and your satisfaction matters.

## That's Why We're Excited to Announce the WasteWORKS – CSG Forte Integration Solution

CSG Forte's powerful payment processing solution is fully integrated into WasteWORKS' cashiering platform to reduce manual processes and manual keying/accounting errors that many customers experience when using a separate or non-integrated payment solution.

The integration into the V400C contactless, EMV/chip-enabled credit card terminal offers you the most up-to-date and secure payment processing at the point-of-sale.

By partnering with CSG Forte and WasteWORKS, you can take payments confidently either in-person or online, maintain card on file, and experience real-time reporting that works for you.
